

BAL

just mix

2.5
parts
powder

to

1
part
water

Remember...

'Supercover' requires almost twice as much water compared to standard products.

Believe it - 60% further!

"Half a mixed bag was like a full bag of normal adhesive. Before I thought '60% extra, yeah right' ...but it's a genuine claim and I really like this stuff."

Andrew - Surrey

"It's so flexible it almost bounces! And the weight at 15kg is a bonus especially if you have to carry loads of the stuff ...trust me it makes a difference."

Michael - Staffordshire

"Negatives - didn't find any... I'd probably use this on any rapid flex application."

Gareth - Anglesey

Building Adhesives Limited, Longton Road, Trentham, Stoke-on-Trent, ST4 8JB, England. Tel: +44 (0) 1782 591100 www.bal-adhesives.com

60% more coverage kg for kg. NOW IN WHITE.

Kilo for kilo it goes further!

supercover rapid flex

just mix 2.5 parts powder to 1 part water for 60% more coverage

This is better than a “normal” fast-setting flexible adhesive for one very good reason. It goes a lot further!

Just check your mix ratio

Trust us. You DON'T need as much powder as you'd “normally” expect. Just 2.5 parts powder to 1 part water, and you're ready to spread. Easy!

It's another great BAL formulation to give you all the performance you want and expect, including:

- Flexibility with excellent bond strength
- Highly water/frost resistant
- Rapid-setting: grout in just 3 hours

It really DOES work!

You'll find that, kilo for kilo, BAL Supercover Rapid Flex gives you up to 60% more adhesive coverage. And a first class result, even with porcelain tiles. In fact, just like the pack says!

*just mix
2.5 parts powder to 1 part water*

*Remember...
'Supercover' requires almost
twice as much water compared
to standard products.*

BAL Supercover Rapid Flex Adhesive is available NOW in Grey and White.

Now available nationwide.
