

# GET READY FOR THE FUTURE

Tailored training  
courses at our  
state of the art  
Innovation and  
Technology Centre

# Tiling courses tailored for you

**Built with you in mind, our Innovation and Training Centre revolutionises training in the tiling industry. Providing training on the latest installation practices and new technologies, our structured or bespoke courses will help you develop new qualifications or enhance your skills to develop your business.**

Designed to the highest specification, the BAL Innovation and Technology Centre leads the industry in quality training.

Featuring interactive technology, a demonstration auditorium that can seat more than 40 delegates and practical training bays, it provides the perfect platform for you to enhance your skills and qualifications.

We offer a range of suitable courses for all tiling industry professionals including fixers, trainees, contractors, distributors and architects. Courses range from a basic introduction to adhesives and grouts, to specialist courses on preparation of walls and floors for advanced projects.

Led by the UK's leading trainers in the tiling industry, our comprehensive programme of presentations, practical workshops and demonstrations will develop your skills and techniques for consistent Best Practice achievement of high quality, lasting installations.

Thanks to our multi-use facility, we can also offer bespoke courses to suit your specific training needs.
